

Fig. 30. **De novo synthesis at radular sac and stage I.** A series of spots (39.4-kDa, 38.856-kDa, 37.7-kDa, 37.9-kDa, 37.4-kDa, 37.6-kDa, 37.2-kDa, spot No.19, 20, 21, 22, 23, 24, 25) appeared only around sac and stage I and the autoradiography also showed they were synthesized at sac and stage I. Another protein (spot 53) also has the same characteristic.
